FLEX-COVER® GRATE (FCG)

RAPIDLY DEPLOYED FLOOD PROTECTION FOR OPENINGS WITH GRATED COVERS

The Flex-Cover® Grate system is an economical and reliable method of dry flood protection. It features a highly durable coated fabric cover that is built to withstand any water depth and shaped to fit any opening configuration. The cover is lightweight and simple to install (and remove) by a single person within minutes, even in high winds. Point-of-use storage options are available, giving you the advantage of storing it directly beside the grate or nearby in our optional container. The Flex-Cover Grate can also be adapted for use on vertical ventilation shaft covers or louvers by bolting into the surround.

Flex-Cover® Grate Benefits

- **Simple Operation** – Requires very little training to install or remove it quickly
- **Compact And Convenient Stowage** – Stores in small spaces, and point-of-use storage options provide the advantage of storing it directly beside the grate or nearby in our optional container
- **Scalable Design** – Can be sized to fit specific needs or codes
- **Robust Materials And Construction** – Provides reliable protection from water, waves and wind
- **Variety Of Configurations** – Available as a horizontal ventilation grate barrier (ideal for emergency escape hatches at grade), vertical ventilation grate barrier (ideal for openings on buildings or walls) or as a standard- or custom-shaped barrier
- **Optional Point-Of-Use Storage Available** – Available with an optional container to stow components
